

Letter to Change.org

Ask all the institutions in every corner of the planet to join this global DEDODEDIOS PROJECT.

King Sun, 20th of June, 2017

DEDODEDIOS PROJECT is an union of the cultures and races beyond the color of their skins, creed or political way of thinking.

This movement starts in Spain, fraternal place of all cultures and villages indistinctly from their national origins in order to join it no matter where you come from. Although, you are in any other national origin on earth, join us and take the values of our common project to the street, and translate them to your mother tongue and send this message as far as you can.

We are fed up to hear from the media all our differences and what separates us, to bear all over again with the negative history of what happened before, and now we are going to see forward, towards a common project and future as it couldn't be in another way.

It is worthless to be upset with your own neighborhood for the rest of your life because your grandfather argued with his grandfather and we didn't exactly know the reason why.

You have more things in common with those who surround you than with the fears which cannot let you give the step forward to be in harmony with them.

“Stop looking for the dark side in others, because at the end, you will find it”. (One Religion, one Creed, One Thousand Words, page 23).

Let's talk about respect because of the religious side of others.

With regard to the religious point, as it couldn't be in another way, I will say to that, the ancient deities, they all come from a common creator and this takes us to a unique very first God, a first creative conscious of everything which exists. Every village gives a specific name to name the same thing and it is the same well known God in every village, with a unique name because God has that capacity, to have endless names and all of them will be right ones for him and all of them will be appropriate ones. Because it will be taken into consideration the intention on how he is invoked. The purpose he is required for is, and not the name as he is called off, and also he is called without invoking himself, because he is always in situ.

Those ones who have several Gods, they are interpreted as saint authorities in occident which come from a common creator and that small different perception is solved.

Even the most non-religious person begs for those ones when he/she is going to lose, respect those ones who don't believe, to demand them the same level of respect for all of you, at the same time.

Even the most non-religious person says, well, I know there is something....

Let's light that flame, that ``something'', let's turn it into a good reason to be all together, to remind others we can from a common trunk; let's celebrate it supporting with your tiny sand grain this noble cause where they are. Promote these symbols are used by drawers, architects, artists and any creator of our times to last much longer in space and time this message and these values.

There are many projects, ideas and fights whether they are uncovered or not, in order to change things in society. I would like to offer you my hand, and my help, to carry out all those projects as a truth result and have a voice not only here wherever you read this letter, if it is not at a global or universal level.

How is it possible we can be heard and considered at a such higher level?.

I offer you to sum up your projects to mine.

What would the result be of our vision as a whole in this union of intentions?.

A clear final end and an easy path, peace and love.

Why is it easy?

Because we don't demand anything.

Because we don't exclude anyone of anything.

Because we don't differentiate race, color or sex.

Because we don't look for those blamed ones, just for solutions.

Because we don't place anyone over no one.

Because we don't care neither the political thinking nor even religious of the individuals.

What we offer is:

The protection of the woman, man, earth and animals rights.

The abolition of the death penalty.

The gathering of all causes, villages, religions and creeds in just one having these values as solid foundations.

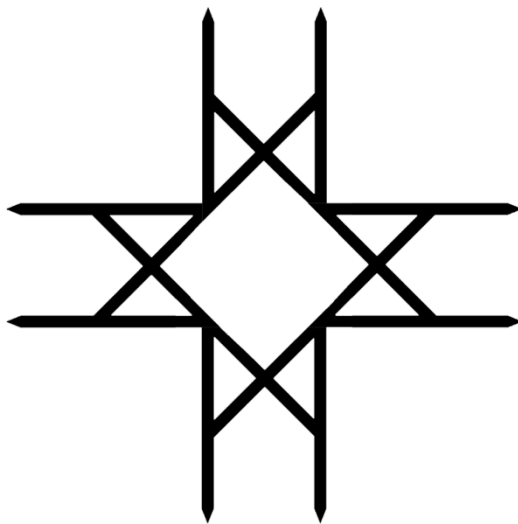

PEACE

LOVE

My name is Francisco Mañas Ruiz.

This project is called “DEDODEDIOS”

These are the symbols of this project.

**STAR OF THOSE WHO LOVE
GOD AND THE EARTH**

DEDODEDIOS PROYECT

The left figure is a Rune which is compound with a Nordic writing, (Futhark) it shows the square, which symbolizes the earth and has a base of sacred geometry.

You can put the symbol of your religion and creed inside, your emblem, flag or whatever you want to put in. It is very powerful, don't waste the opportunity to integrate in it.

To the right side, we have the other symbol which demonstrates we are one. With a half open hand which shows it doesn't hide anything, squeeze the wrist or which doesn't threaten or indicates the highest point, to go up, to grow and without any rigors.

It shows the hand which is grabbed by another one to standstill, and the hand which takes another person to awake that one, it shows the hand

which seeds and harvest, it shows a hand which cannot possess any gun, it shows the truth humanity as a whole.

Use all these symbols in order this project arrives to all corners, forecast them and thanks very much to help all this cause as a whole.

Because THOSE WHO LOVE GOD AND THE EARTH: some of them idolize God, other ones the earth and truly, because those who love God and the earth don't kill women, don't beat them, don't burn and destroy the forest don't humiliate anyone, and their values are solid ones, and they demonstrate it giving a good example, because giving a good example is the best way to teach others. It is a passive teaching process which continues in time, and it is imperishable. Are you on the side of those values or are you with those violent ones?

Place these emblems at your houses, at your workplaces, in your clothes, at your sacred places, in your flags, at your city-halls and being in the country you are and talk the language you talk, if you can understand this message translate and resend it.

My appreciations to you and your supports to this project, forecast them and make of it your values of **DEDODEDIOS Project**, your values.

We have to heal our world and of those descendants' ones, they have to inherit these imperishable values, leave them that legacy.

A very fraternal hug and many thanks to everyone.

A handwritten signature in black ink, consisting of a large, stylized 'F' followed by a cursive 'M' and a long, sweeping tail stroke.

Signed: Francisco Mañas Ruiz

P.D. Here don't ask for any money, time or don't blame anyone. Think about the good things you can do resending this message and support its cause, thank you.
